

New Ginger 'Darzing' Varieties

Doris Marcsik, Senior Horticulturist, DPIFM Darwin

These six 'Darzing' varieties are new ginger cut-flowers bred and developed by the DPIFM, in partnership with the local cut-flower industry. These new ginger varieties has been selected by industry based on important commercial traits such as earlier flowering, improved hybrid vigour and yield, bigger flower size and unique form and colour.

'Darzing Blaze'

- a lovely orange coloured inflorescence
- early-flowering June/July to October
- excellent producer of flowers 80-100 stems/plant
- occasionally produce interesting multifloret head of inflorescences

'Darzing Dawn'

- an attractive orange coloured inflorescence with limey-green coloured inner bracts
- a very early-flowering variety May to October
- good producer of flowers 60-80 stems/plant
- occasionally produce interesting multifloret head of inflorescences

'Darzing Chocolate Delight'

- a unique and beautiful two-tone coloured inflorescence form dark maroon with limey-green coloured inner bracts
- a mid-flowering variety August/September to February
- moderate producer of flowers 30-50 stems/plant
